

## **ENVIRONMENT POLICY**

C.R.S. srl pursues its operating and strategic goals, in the knowledge that the care and protection of the environment are an essential part of its success and client and stakeholder satisfaction.

C.R.S. srl implements a policy of continuous improvement in its environmental performance in order to ensure the application of a model of sustainable development and to contribute to meeting the expectations as to defence of the territory in which it operates, whilst keeping all negative impacts of its activities to a minimum where this is technically possible and economically sustainable.

In order to achieve these objectives C.R.L. srl:

- Performs its activities and services in compliance with the provisions of the law and regulations in force whilst ensuring continuous monitoring, so as to be fully abreast of regulatory developments in the area rapidly; for this purpose, it has implemented an evaluation system of enforceability of laws to all its environmental and securities aspects, to be always updated.
- It applies an effective Environmental Control System in accordance with the requirements of UNI EN ISO 14001 rules; performance is assessed periodically and fitting corrective action is taken to eliminate any deviations that might occur;
- Whenever possible it utilises the best technological solutions available so as to prevent environmental fallout that may result from emergency situations whilst increasing the reliability of running the plant. For this purpose, all environmentally relevant aspects of the business are assessed periodically, in terms of significance and criticality, under normal operating and under emergency conditions and the corresponding critical components undergo scheduled periodic maintenance;
- It manages its business from a standpoint of keeping standards achieved in reducing waste and optimising energy consumption; performance indicators that provide a reference for identifying areas for improvement are updated annually.
- It defines environmental objectives and targets to be integrated with operating management of the plant; for this purpose, a specific heading in the financial statements has been created

**CROMATURA DURA**  
**RETTIFICA**  
**SUPERFINITURA**

to highlight the provision made for environmental and safety expenditure; additionally, data concerning expenses incurred during the course of the year are systematically gathered and are then organised in an organic framework to underline the costs of ordinary, extraordinary and preventive action taken.

- It ensures that corporate development programmes are assessed from the standpoint of environmental sustainability and safety, by encoded procedures;
- It involves all human resources at the plant in achieving high levels of professionalism and responsibility, including by means of training activities; for this purpose, all employees operate with full awareness of the potential risks connected with their activities and are informed as to how important their role is;
- It collaborates activity with local initiatives and representative Bodies in solving specific environmental problems in the surrounding territory; it is committed to providing timely and transparent responses.
- It makes its suppliers participants in its principles of good environmental management and is committed to communicating this policy to all persons working for the organisation and on its behalf, and by making it available also through posting it on the corporate website.
- All employees of C.R.S. srl and supplier companies are called upon to comply with the content of this policy.
